

Martin Tonatiuh Hernández Garfias

QA Functional Test Engineer & Process Automation

 State of Mexico / Mexico City

 +52 56 1562 5182

 hegmtona2024@gmail.com

PROFESSIONAL SUMMARY

Analytical and detail-oriented QA Test Engineer with proven expertise in manual testing, functional analysis, and full Software Testing Life Cycle (STLC) management. Skilled in designing comprehensive test matrices, executing end-to-end (E2E) business scenarios, regression testing, and certifying web, mobile, and complex enterprise platforms (such as Siebel). Actively expanding technical capabilities through workflow automation (n8n), REST API validation (Postman), and database verification (SQL), backed by web development fundamentals (JavaScript, Java, HTML5, CSS3) to bridge testing with agile engineering teams.

TECHNICAL SKILLS

Manual & Functional QA:	Manual Testing, Functional Testing, Regression, Smoke/Sanity Testing, Test Matrix & Case Design (Excel/Jira/XRay), E2E, UAT, STLC.
Automation & Workflows:	n8n Automation (2 years), Automated Workflow Design, Playwright (continuous development), Automation Logic.
APIs, Data & Systems:	Postman (REST API / JSON Validation), SQL (Advanced queries & data verification), Siebel Platform, Windows & Unix.
Web Tech & Development:	Java, JavaScript, HTML5, CSS3, OOP, Python, Git, GitHub, VS Code.

PROFESSIONAL EXPERIENCE

QA Test Engineer & Process Automation

February 2024 – May 2026

Fincomún Servicios Financieros Comunitarios

- Structured formal test plans and designed comprehensive test matrices in Excel defining critical execution paths and timelines.
- Executed end-to-end (E2E) and functional test matrices ensuring high stability and operational accuracy across financial core platforms.
- Implemented workflow automation solutions using n8n to optimize regression test cycles and reduce execution overhead.
- Collaborated directly with engineering teams to document defects with clear visual evidence and track issues through resolution.
- Generated daily progress metrics, bug tracking charts, and test execution status reports for stakeholders.

Functional Test Engineer

October 2023 – February 2024

People Media

- Designed functional test cases, logged software anomalies, and verified application health against core functional specifications.
- Executed business process flows, managed user test profiles, and validated client-side transactions.
- Conducted regular functionality reviews directly with clients to ensure alignment with operational requirements.

QA Functional / Manual Tester

March 2020 – October 2023

SKY

- Executed structured manual tests across customer web portals, mobile applications, and enterprise CRM platforms (Siebel).
- Managed pre-release and post-deployment app version validations on mobile test devices to ensure target environment readiness.

QA Tester (Concurrent Project-Based)

October 2021 – July 2023

Lausnetz

- Executed functional test matrices across multiple user roles and reported technical discrepancies upon code modification failures.

Web Designer & Process Estimator

August 2018 – September 2021

Obras e Infraestructura

- Developed responsive commercial web solutions using HTML, JavaScript, and implemented process modeling with MS Visio and Java OOP.

EDUCATION

Technical Degree in Computer Science
CONALEP Magdalena Contreras | 2002 – 2005

LANGUAGES

Spanish: Native
English: B2 / Technical (Technical documentation, reading and professional communication)
